

Brainstorming & Idea Prioritization Template

Date	12 July 2026
Team ID	[Insert your assigned Team ID]
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Lalith Surya Prava	Use dual models (BiLSTM + BERT) together so predictions are cross-checked for higher confidence, and integrate Gemini AI to generate natural, personalized guidance.	Model Architecture / AI Response Generation	1
2	Tammineni Yogeswararrao	Detect mixed / secondary emotions (e.g., Confused + Curious) instead of a single label, and build a Streamlit analytics dashboard to visualize emotion trends and model confidence.	Model Architecture / Analytics & Visualization	2
3	Chaitanya Prasanna Kumar Munagala	Log every interaction (input, emotion, confidence, response) to CSV for later analysis, and add an offline fallback response mode in case the Gemini API is unavailable.	Data Logging / Reliability	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Dual-model (BiLSTM + BERT) emotion detection with Gemini-powered personalized guidance	High	High	1	Yes
2	Mixed-emotion detection with a Plotly-based analytics dashboard for emotion and confidence trends	High	Medium	2	Yes
3	CSV interaction logging with an offline fallback handler for reliability	High	Medium	3	Yes
