

Demonstration of Proposed Features

Date	12 July 2026
Team ID	
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated.

S.No	Feature Name	Description	Status (Implemented/Partial/Pending)	Demonstrated (Yes/No)	Remarks
1	Dual-model emotion detection	Classifies text into 5 emotions using BiLSTM + BERT	Implemented	Yes	BiLSTM path works as intended; BERT path currently uses a mock
2	Mixed-emotion detection	Flags secondary emotions above a confidence threshold	Implemented	Yes	
3	Gemini-powered guidance generation	Personalized guidance text based on detected emotion	Partial	Yes (via mock)	Currently uses MockGeminiHandler rather than the live Gemini API
4	Offline fallback handler	Returns canned guidance if the Gemini API is unavailable	Implemented	Yes	
5	CSV interaction logging	Persists every interaction for later analysis	Partial	Yes	Two logger implementations write inconsistent schemas to the same file
6	Analytics dashboard	Visualizes emotion distribution and model confidence	Implemented	Yes	

7	Model comparison (BiLSTM vs BERT)	Runs both models on the same input and reports agreement	Implemented	Yes	
8	Streamlit single-page UI	Ties all modules into one interactive flow	Implemented	Yes	

Feature Implementation Summary:

Metric	Value
Total Features Proposed	8
Total Features Implemented	6 fully implemented, 2 partial
Total Features Demonstrated	8 (all demoed, 2 via mock/workaround paths)
Overall Implementation Rate (%)	75% fully implemented (6/8)
